World Towers

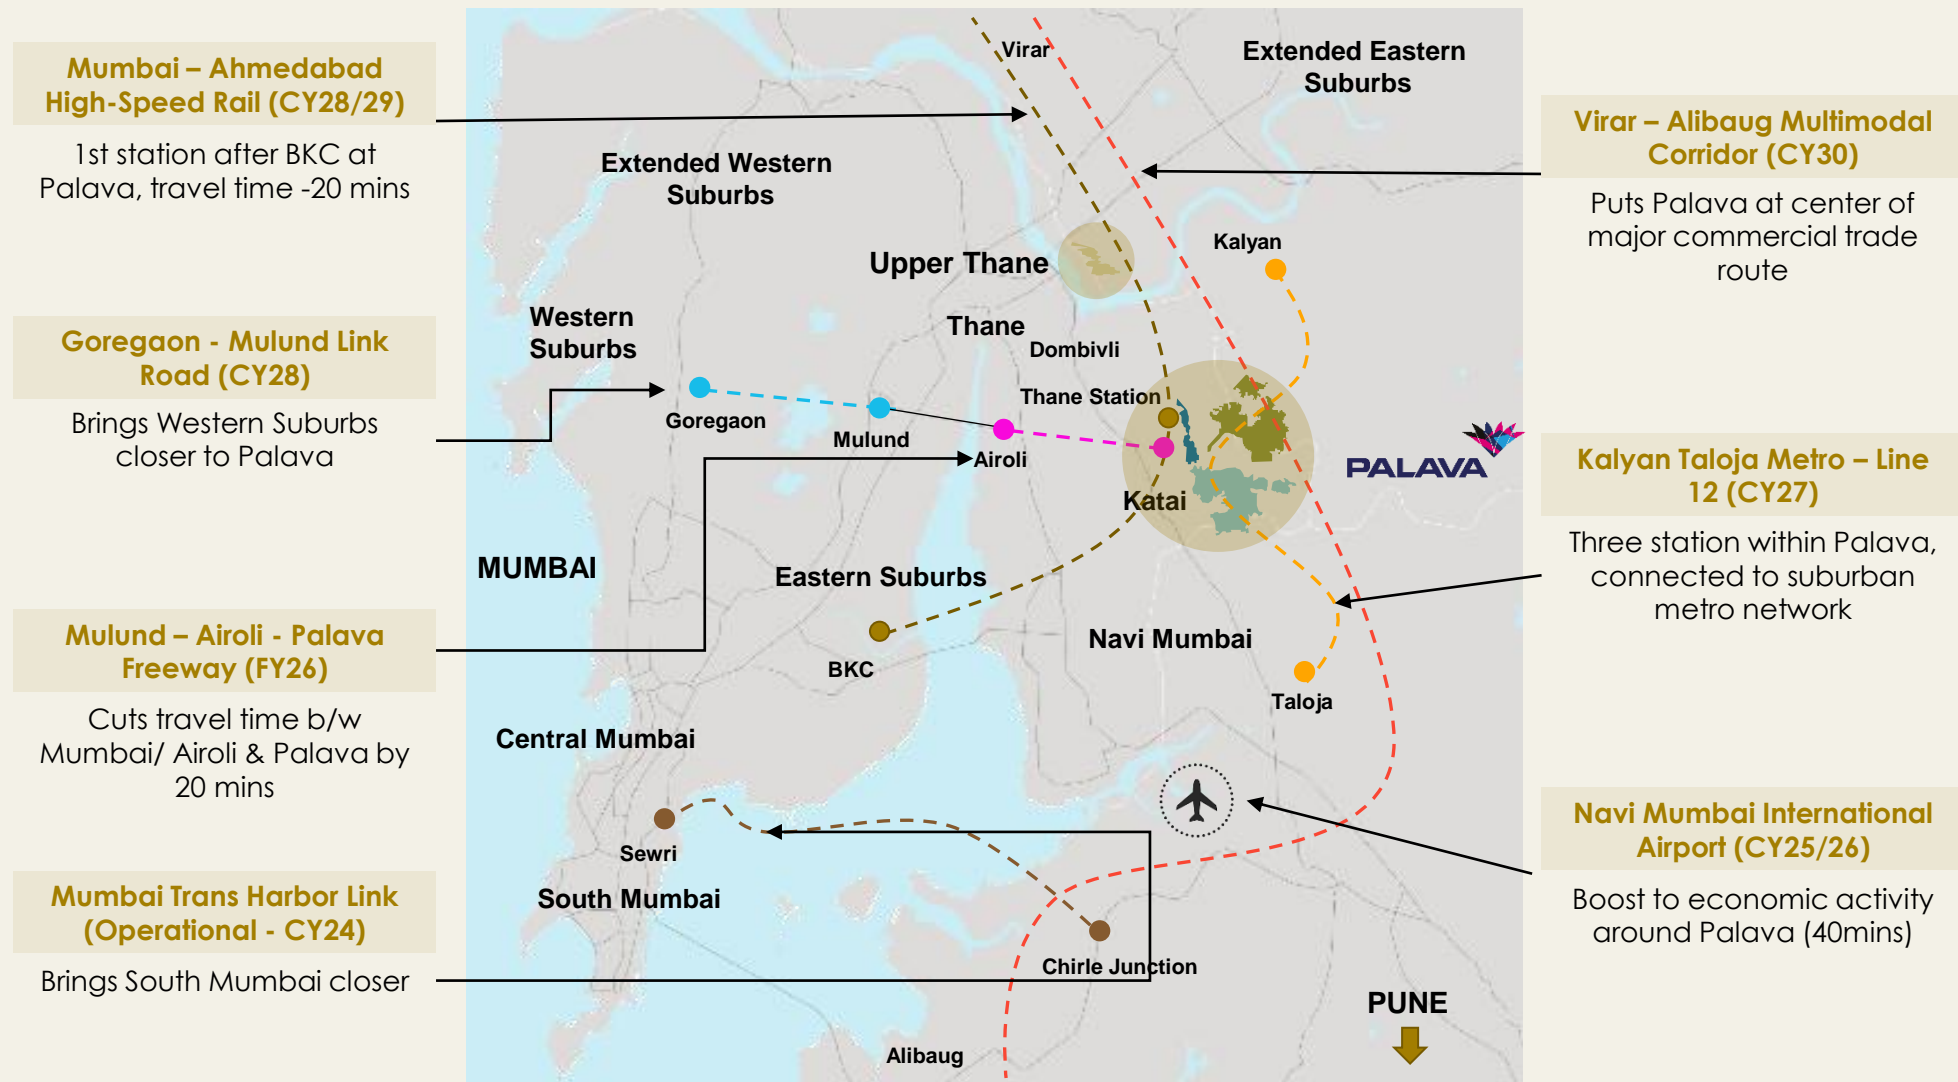

Palava & Upper Thane set to deliver US\$ 175-200 bn of sales over next 3 decades with ~50% EBITDA margins

3 mega trends shaping Palava & Upper Thane to become sought after suburbs

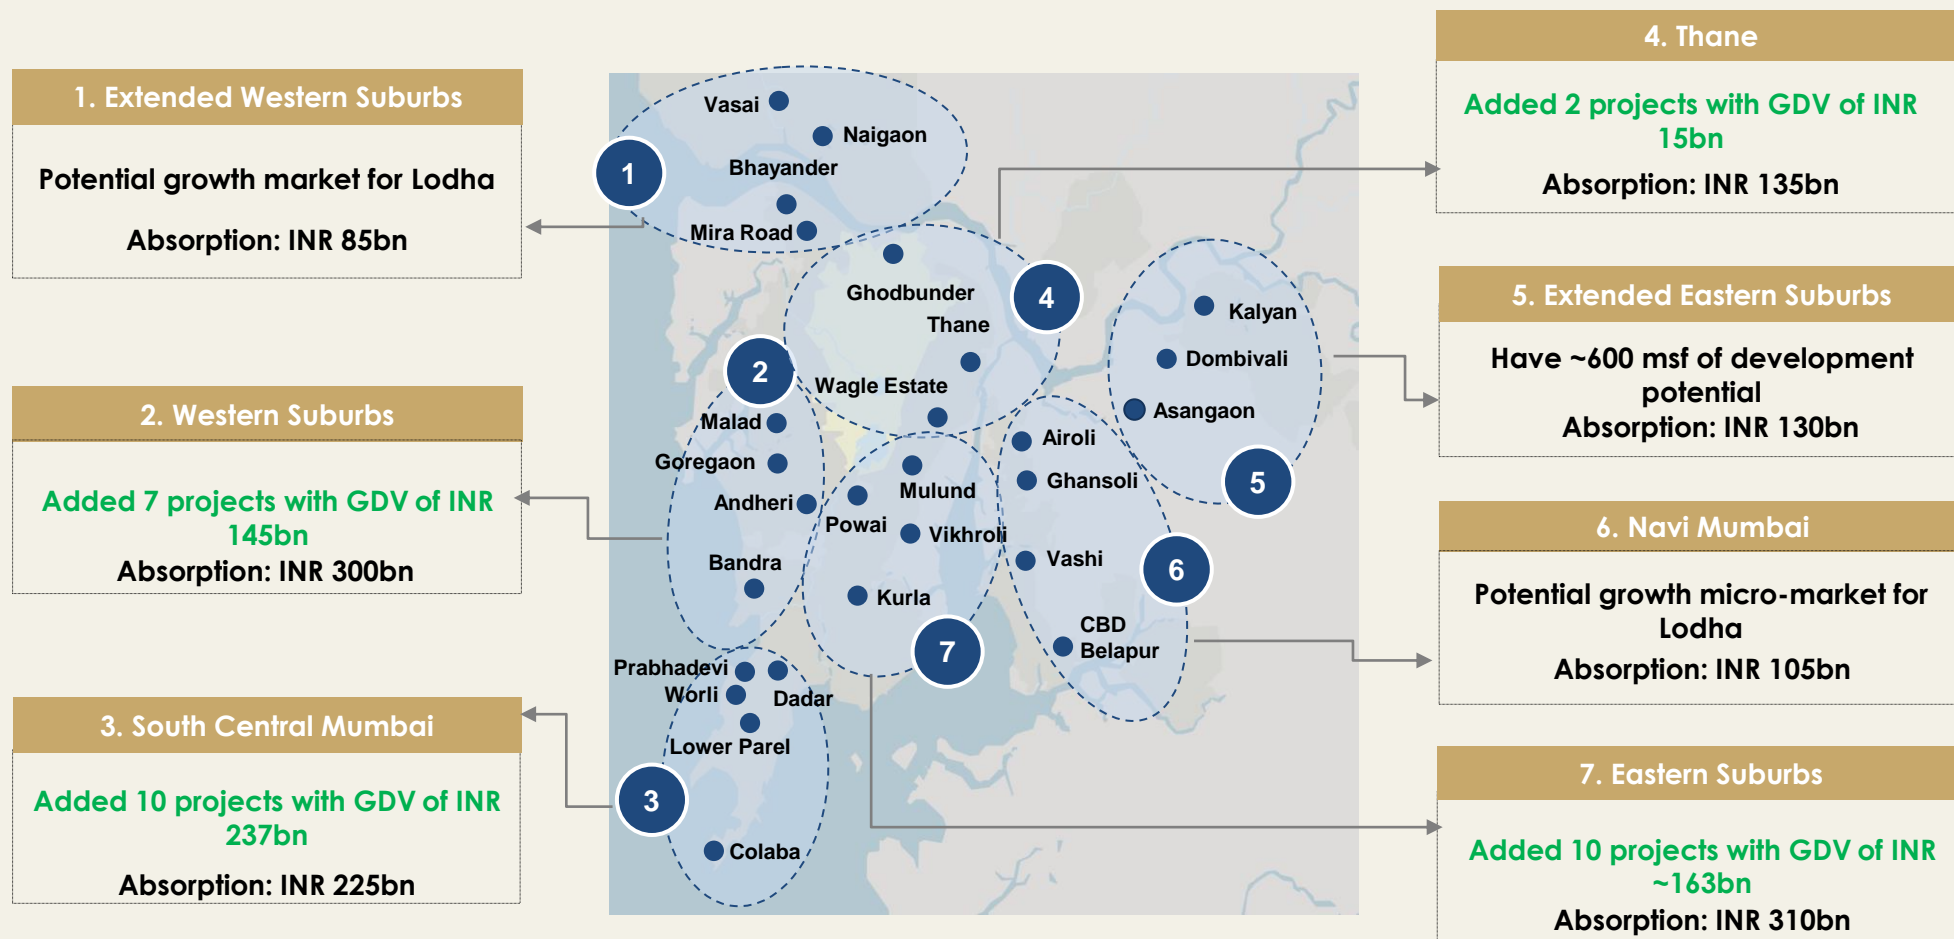

1. Mumbai – **World's densest metropolis**, sea restricts expansion in West and South
2. India going through **once in a country's lifetime transition from low to mid-income**, leading to significant demand for aspirational and premium housing
3. **Palava** City at the epicentre of Mumbai Region (MMR)'s **infrastructure upgrades**:
 - a. Mulund – Airoli - Palava Freeway to make **Airoli, Mumbai's IT Hub, predictable 20 min drive** from Palava (Est. FY26)
 - b. **Navi Mumbai airport** at **just 40 min drive** from Palava (Est. CY25/26)
 - c. First stop of Mumbai-Ahmedabad Bullet train after BKC at Palava, **predictable 20 min journey to BKC** (Est. CY28/29)

Ongoing infra projects (Airport, Metro, Bullet Train etc.) to supercharge Palava's growth

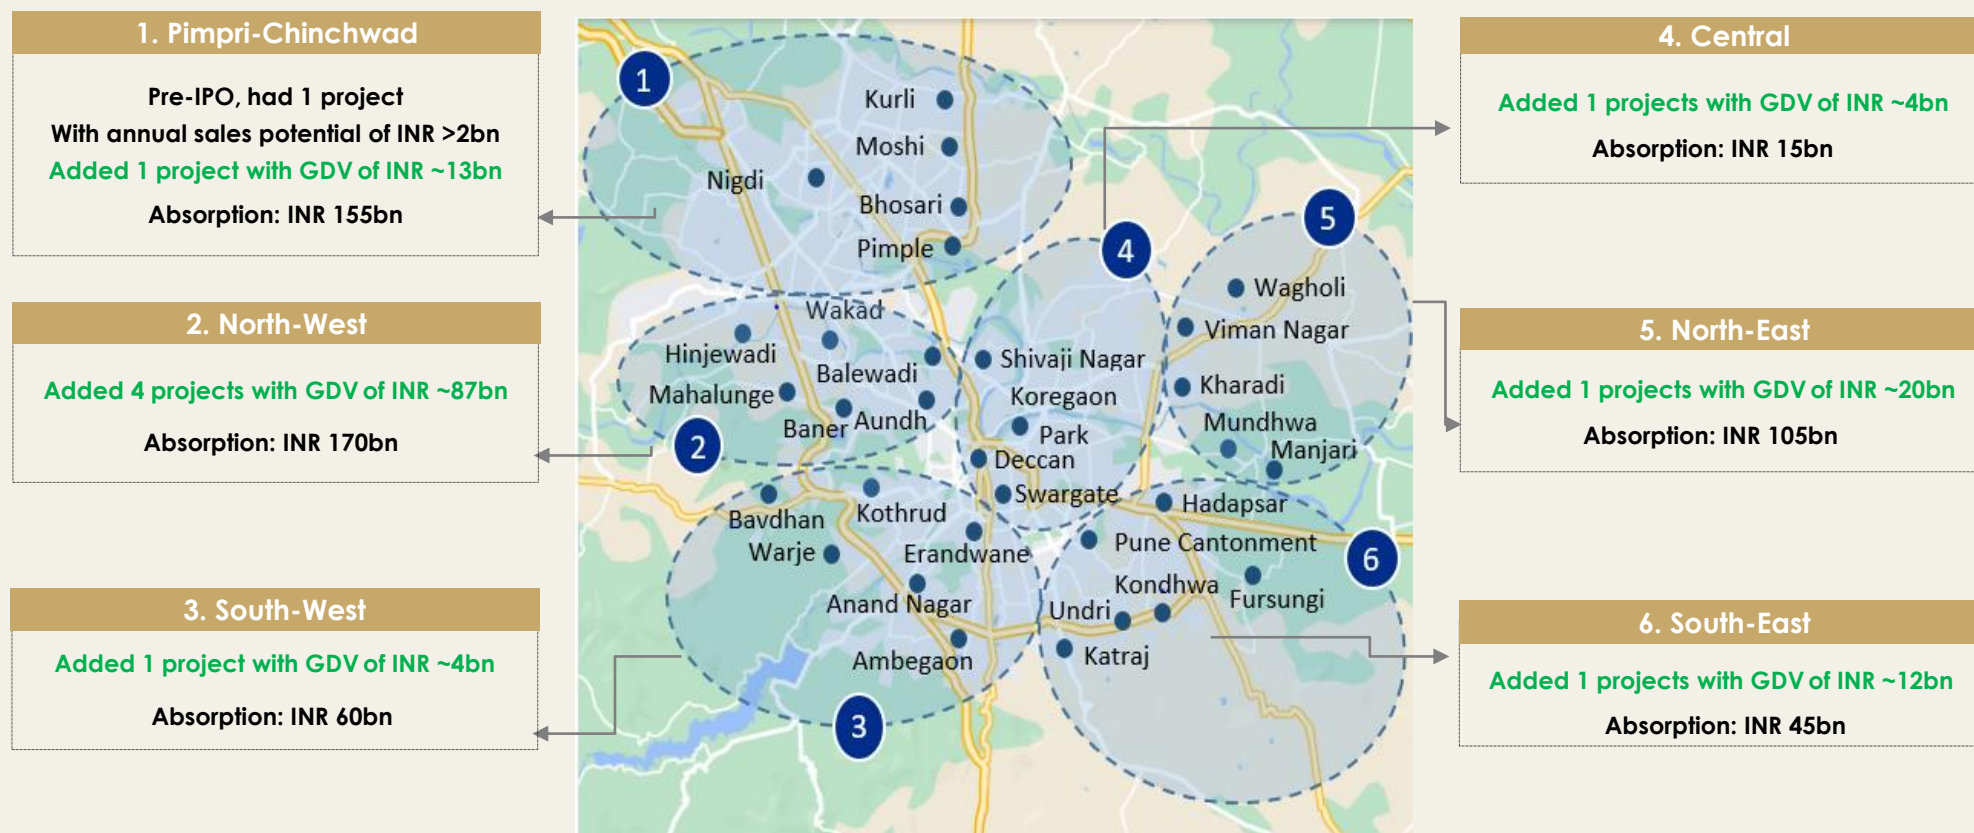

Establishing presence across MMR through 'Supermarket' strategy

Tied up INR ~560bn of GDV and development potential of ~25 msf across 29 projects in various micro-markets of MMR

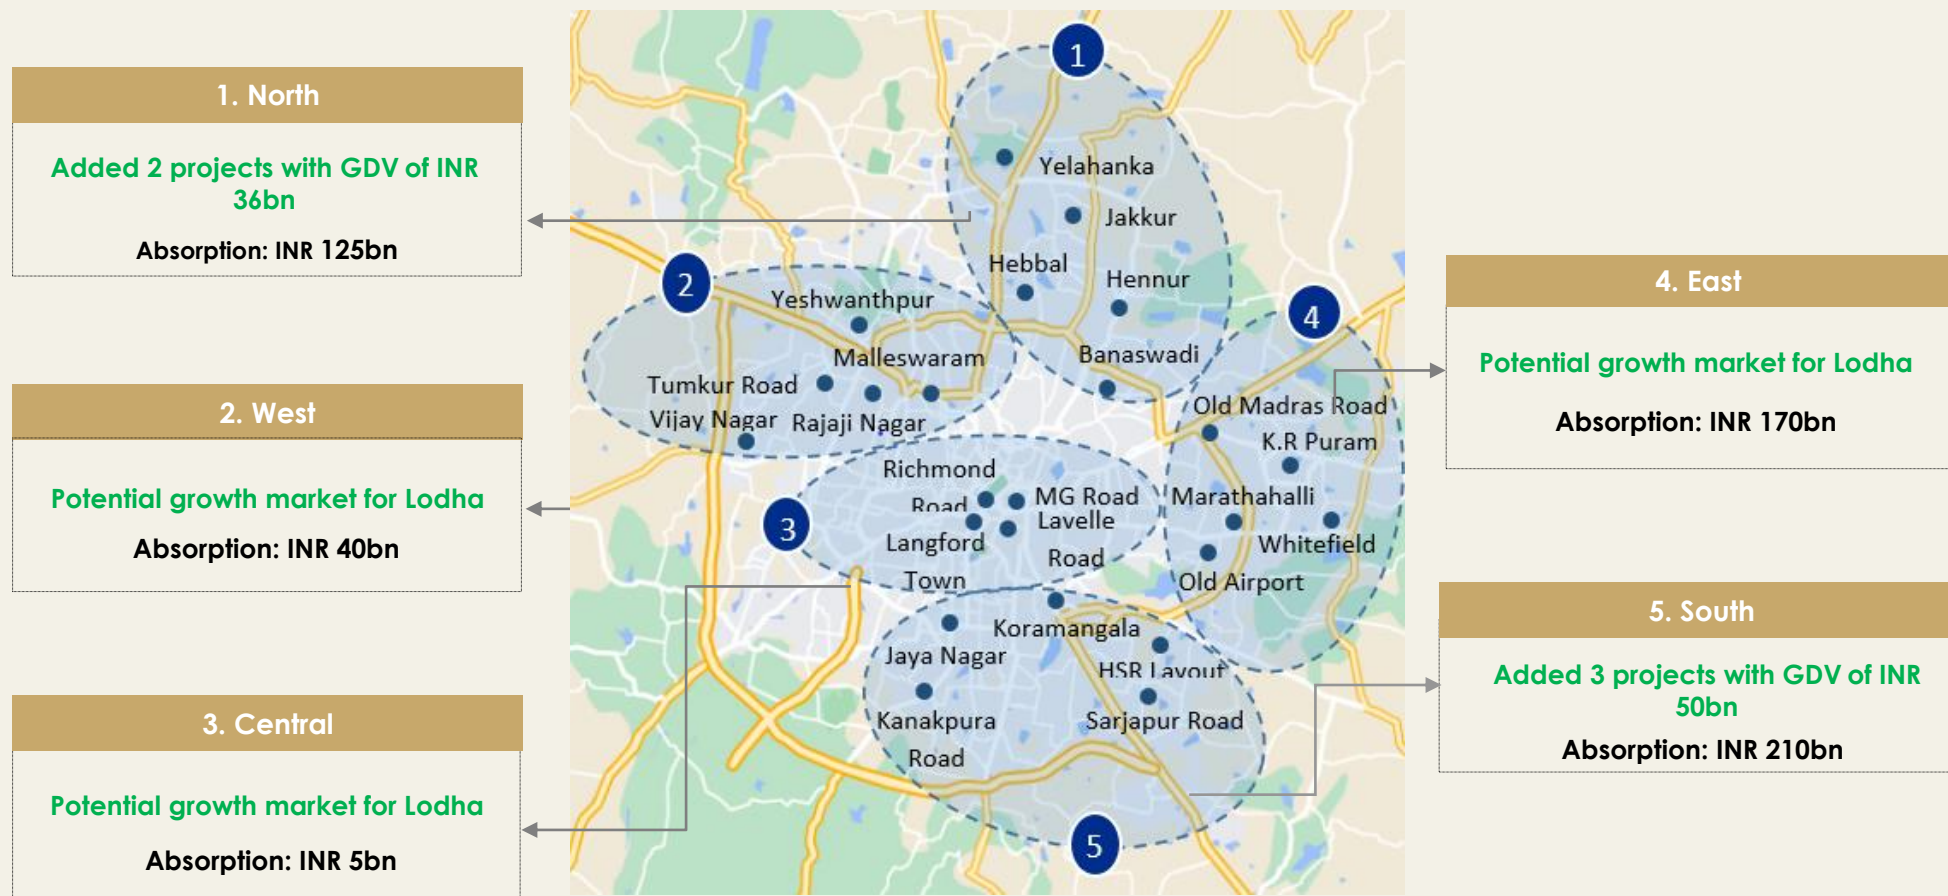

Pune — Will contribute to growth in a sustainable manner

Accelerating growth in INR 550bn market by establishing presence across multiple locations

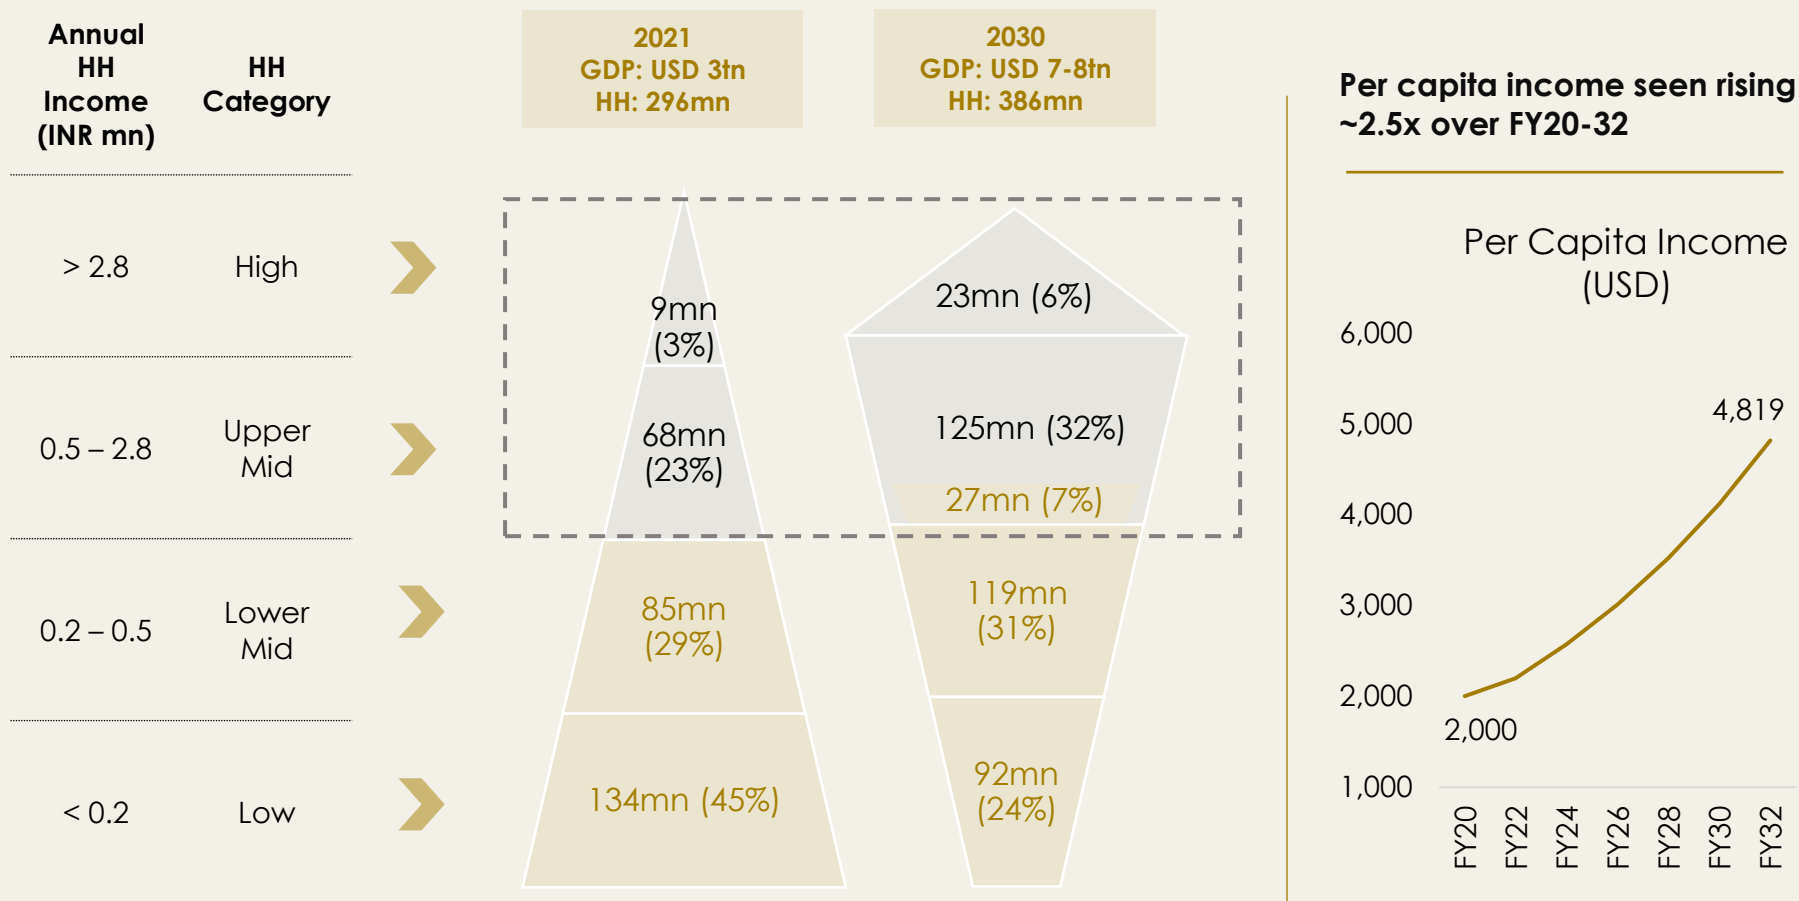

Tied up INR ~140bn of GDV with development potential of ~15.5msf across 9 projects in various micro-markets of Pune.

Bengaluru – Entered growth phase, aiming ~15% market share in medium term

Launched two projects in FY24, Mirabelle & Azur; Both received phenomenal response

75-100 mn new households to become 'home ownership capable' this decade

Even assuming significant industry supply growth¹, supply is likely to be <10 mn units. Once in a country's lifetime opportunity!

Supply side consolidating – unlikely to keep pace with accelerating demand

Consolidation wave due to policy reforms and liquidity crisis...

• Remaining Tier - 2 & 3 players develop:

- Small-sized projects (< INR 5bn)
- One at a time
- Take longer (5-7 years) to complete

Multiple forces leading to consolidation

- ✓ Regulatory push: **RERA, Demonetization, GST, Amendment to Benami Act.**
- ✓ Funding squeeze for Tier – 2 & 3 developers:
 - NBFC's exiting market after large losses – wholesale lending bubble popped after IL&FS implosion
 - Inability to **sell during construction**
- ✓ Consumer loss of confidence with Tier – 2 & 3 developers:
 - Having **burnt their lifetime savings**
 - **Failure to deliver or untimely delivery** with poor quality

...has led to market share gains for listed and leading non-listed developers

Housing sales in top cities to reach 1mn by 2030

Steady as it goes:

Mortgage an enabler, not inducer of demand

- Conservative Central Bank, low risk mortgage market: LTV <85%, no teaser rates
- Rate cycle on downward trajectory
- Strong performance of mortgages through all parts of the cycle - Intense competition for safe haven mortgage assets leading to plentiful availability
- A floating rate product; rate cycle well understood by homebuyers. Interest rate change modifies tenure, not EMI
- Salary growth of 8-10% enables mortgage repayment in 7-8 years

Housing sales driven by fundamental need and nominal price growth, not by mortgage inducement

Low risk to margins from construction cost inflation

- ✓ Construction costs typically forms 25% to 45% of the sales price
 - Of which, one-third is related to low skilled and semi-skilled labor: plentiful supply through migration from rural areas (250+ mn people estimated to be 'underemployed' in agriculture). Hence, labour inflation is low and keep inflation from being 'sticky'
- ✓ Commodity inflation, though often sharp, generally of short cycles as demand and supply adjust to new normal, bringing price moderation in the short term
 - Spurt in commodity price due to Russia-Ukraine war is reversing
- ✓ ~3 year period of construction provides flexibility to manage costs across the project lifecycle
- ✓ Ready and advance under-construction inventory provides hedge against the commodity price inflation

Moderate construction cost inflation

Construction cost increase since 1st April 21 at ~3% annualized rate

This, in turn, implies impact on COGS of <2% p.a. for our portfolio

Multiple benefits of consistent housing price increase below wage growth

- ✓ Improves affordability leading to increased volumes
- ✓ Leads to significant wealth creation for home owning middle class ('Wealth Effect')
 - Boosts consumption as consumer confidence increases
 - Housing is a vehicle for generating *retirement surplus*; rising home prices enable older population to maintain spending power
 - Creates an *inflation hedge* especially for young home owners
- ✓ Rising home prices have a positive impact on the housing and allied industries which in turn has a big multiplier effect on the economy
 - Has the highest labor to output ratio
 - Housing is among the largest employment generators
 - Has among the biggest multiplier effects on SME segment through supply chain
 - Highest ability to pull the unskilled masses from the farm & convert them into skilled workforce over time
